The characteristics of the diamond in this report were based on the information gained from utilizing a variety of gem testing instruments.

The following instruments were used as required to complete our examination: 10x magnification with a fully corrected loupe and binocular microscope, millimeter gauge, computer aided non-contact measuring device, spectroscopic systems, Proportion Scope, electronic balance, master color comparison diamonds, ultraviolet light sources, fiber optic illumination, and other instruments. The diagram is an approximate representation of the type and relative position of internal and external characteristics. Red symbols indicate internal characteristics and green symbols indicate external characteristics.
